You will never think about KPIs the same way again!

"Government and non-profit agencies are both completely different and at the same time exactly the same as private sector organizations. David has done a brilliant job of presenting the basic principles and lessons (hardly learned from the private sector) as applied in the mission-driven sector. This powerful and unique viewpoint should help prevent society from re-learning what has been learned, and thereby help best practices forward to benefit all. This work surpasses all previous works in capturing what society has learned and applying it where it is needed most."

—Brett Atkinson, Executive Partner, pm2 - Performance Measurement and Management

"We have always known core business processes that David Parmenter does in his new book *Key Performance Indicators for Government and Non-Profit Agencies.* For too long, managers and strategy and performance professionals have blindly followed assumptions about what performance measurement is about, wasting vast amounts of time and effort measuring the wrong things in the wrong ways. David reminds us, in his usual practical India, how to return to a more rational approach to the wrong way!

—Stacey Barr, author, presenter, and facilitator, PuMP Performance Measure Blueprint Workshops and Online Programs

"In his new book, David Parmenter brings a breath of fresh air to the art of crafting and implementing performance metrics. With a set of very few measurement worth in the cupboard of business operations, David once again provides page after page of practical, no nonsense advice about what to do when the usual strategies fail. He’s not afraid to poke holes in sacred methodologies and complex approaches. This book is a check-full of practical nuggets of advice. It’s a manual for performance management success."
